

asset360  
secure™

asset360 secure™ is a web based asset and inventory management application that offers the asset management functionality required by international financial regulations standards such as IFRS, GRAP, GAAP and MScOA. In addition, asset360 secure™ adds non-capital assets to a rental or loan asset register. It hosts a state of the art contract manager to manage rental and loan contracts with actuarial calculations to compute Present Values, Payments and Rates within complex contracts accurately. asset360 secure™ has a SDK with various handheld barcode and RFID readers with comprehensive business processes to validate or change asset and inventory details.
